

ABHISHEK KUMAR

AI & Machine Learning

CONTACT

- +91 9773582546
- meabhsk@gmail.com
- Greater Noida, India
- [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

CORE CAPABILITIES

- LLM Integration & Post-Training
- Predictive Modeling & EDA
- AI Infrastructure & Pipelines
- Full-Stack AI Development
- Feature Engineering
- Model Evaluation & Alignment
- Problem Solving & Debugging
- Data Analysis & Visualization

TECHNICAL SKILLS

AI & Machine Learning
LLM, Predictive Modeling, EDA
Programming
Python, JavaScript (ES6+), SQL
Frameworks & Libraries
ReactJS, Node.js, Express, TensorFlow, Pandas, Scikit-Learn
Databases & Cloud
MongoDB, MySQL, AWS, GCP
Developer Tools
Git, GitHub, VS Code, Google Colab, Jupyter Notebook

CERTIFICATIONS

- Software Engineering – NPTEL
- Compiler Design
- What is Gen-AI
- Oracle SQL Certified

INTERESTS

- Prompt Engineering
- Vibe Coding
- Cricket

PROFILE SUMMARY

Emerging AI & Machine Learning Engineer with hands-on experience in LLM integration, predictive modeling, and full-stack AI application development. Strong foundation in Data Structures, Algorithms, Python, SQL, and backend engineering with a focus on building scalable AI infrastructure and data pipelines. Recognized for delivering optimized, AI-driven solutions through strong problem-solving skills, model evaluation expertise, and collaborative delivery in professional remote environments.

KEY HIGHLIGHTS

- Built and deployed an AI B2B Proposal Generator integrating LLMs to automate custom product recommendations with strict budget-constrained cost breakdowns.
- Performed EDA on 500K+ customer transactions and achieved superior model accuracy using Random Forest and Extra Trees algorithms.
- Contributed to LLM post-training and alignment workflows at Ethara.AI, ensuring high-quality model evaluation and data processing standards.
- Designed full-stack architecture handling AI API communication, prompt validation, and persistent database storage end-to-end.

PROFESSIONAL EXPERIENCE

Ethara.AI

LLM Post Trainee | Remote | March 2026 – May 2026

Focused on LLM post-training, model alignment, and evaluation workflows in a full-time remote environment

- Led LLM post-training and evaluation workflows to improve model alignment with human intent and enhance response quality across diverse task categories.
- Contributed to generalist AI and data projects, ensuring high-quality data processing pipelines aligned with industry standards and compliance requirements.
- Collaborated with Quality Leads to maintain strict adherence to model evaluation guidelines, project timelines, and deliverable benchmarks.
- Managed end-to-end task execution within a fully remote environment, consistently meeting specific business requirements and deadlines.

KEY PROJECTS

AI B2B Proposal Generator | Feb 2026

- Developed an AI-powered B2B proposal generator to automate custom, sustainable product recommendations at scale.
- Engineered budget allocation and cost-breakdown logic to strictly enforce client financial constraints with zero overruns.
- Built full-stack architecture to handle AI API communication, prompt validation, and persistent database storage.
- Integrated LLMs to simultaneously output client-facing Markdown summaries and structured JSON data for downstream processing.

Black Friday Purchase Prediction | Oct 2025

- Performed comprehensive EDA on 500K+ customer transactions, identifying key purchasing patterns and behavioral trends.
- Built and benchmarked predictive models — Linear Regression, Decision Tree, Random Forest, Extra Trees — achieving higher R^2 and lower RMSE.
- Delivered actionable insights to optimize marketing campaigns and enhance sales forecasting accuracy for business stakeholders.

EDUCATION

B.Tech in Computer Science & Engineering CGPA: 7.22/10

Galgotias University, Greater Noida | 2022 – 2026

Class XII – PCM 83.33%

Kiddy Convent High School, Patna, Bihar | 2021

Class X 74%

Patna Central School, Patna, Bihar | 2019

ACHIEVEMENTS

- Certified in Software Engineering (NPTEL) – demonstrated academic excellence in core engineering fundamentals.
- Research Paper Accepted — ICRACS 2026: Narrative-Preserving Video Summarization via Transformer-Guided Masked Autoencoding (Paper ID: 563) [\[Certificate\]](#) — demonstrates applied AI thinking beyond coursework.
- Bug Hunting for a Startup – identified critical mobile app bugs and shared structured daily updates, directly improving app stability and user experience.
